

FUNCTIONAL SPECIFICATIONS OF STRAIGHT DUAL TRANSDUCERS

Contact straight transducers (PZT) are designed to search for internal defects (pores, hairlines, cracks, bond failures, etc.), as well as to search for local thinning in metal structures and walls of products, including those made of low-alloy and austenitic steels.

***Any standard sizes are available**

| Model | Designation | Working frequency, MHz | Dimensions, mm |
|--|---------------|------------------------|--|
|  | P112-2,5-12/2 | 2,5 | Ø 20 height 42* (any standard sizes are available) |
| | P112-2,5-20/2 | 2,5 | |
| | P112-5-12-2 | 5 | |
| | P112-5-3x4 | 5 | |
